The Seven Deadly Wins?

Geolocation

Show Job Location via Google Maps

K.I.S.S

Since Nav Bar and page flow are just normal, it is much simple.

Scalable

Users become able to post jobs.

Social-Media

User have to login their gmail to apply the vacancy

Cross-Platform

As the app is an web application, every device can access the website via browsers.

User can apply jobs they prefer according to job location and job title

The app is so convenient that user can apply jobs from home page.

Since the website is still under development, it is disappointing.

Stay tune for the website update.
